JUMO mTRON T

Measuring, Control, and Automation System

Analog input module 4-channel

Brief description

The analog input module 4-channel is equipped with four universal analog inputs that are electrically isolated from each other for thermocouples, RTD temperature probes, resistance transmitters, resistance/potentiometers, or standard signals (current or voltage) as well as one digital input (DC 0/24 V). The digitized input values/states are available in the system for further processing.

LEDs are used to indicate applied voltage supply, the module operating status, as well as the logical status of the digital input.

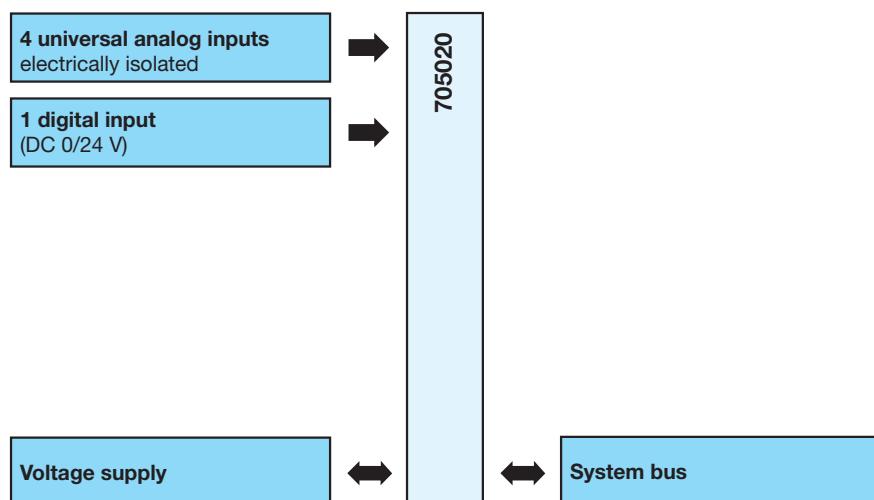

A setup program can be used to comfortably configure the analog input module.

For service work, the module insert can be easily pulled out of the case at the front. The case including the bus PCB remains mounted on the DIN rail.

Type 705020/...

Block diagram

Features

- Four high-quality, universal analog inputs for thermocouples, RTD temperature probes, resistance transmitters, resistance/potentiometers, or standard signals
- All analog inputs are electrically isolated from each other
- Customer-specific linearization (up to 45 pairs of values or polynomial up to the 4th order)
- Limit value monitoring
- One digital input DC 0/24 V
- Automatic configuration after the module insert has been exchanged (Plug and Play)
- Connection of the inputs at the front
- Removable terminal strips with Push-In technology
- Quick wiring of operating voltage and system bus due to easy module connection

Approval/approval marks (see "Technical data")

Description

Limit value monitoring

For each analog input, two separate alarms (min/max alarm) can be activated; each alarm has its own limit value. Alarm type, event text, collective alarm, alarm suppression, and alarm delay are configurable.

Analog inputs

The four analog inputs are universal measuring inputs for RTD temperature probes, thermocouples, resistance transmitters, resistance/potentiometers, and standard signals (current, voltage). Linearizations for over 20 common measuring probes (RTD temperature probes, thermocouples) are saved. A measured value offset or a fine adjustment can be carried out to compensate for plant-specific deviations. Due to the measuring circuit monitoring, a measuring range that is too high or too low, probe/cable break, and probe/cable short circuit are detected – depending on the measuring element type – so that the system is switched to an operational safe status in the event of an error.

Customer-specific linearization

A customer-specific linearization is also possible. The required linearization curve can be entered in the setup program using up to 45 pairs of values or a formula (polynomial up to the 4th order).

Digital input

In addition, a digital input DC 0/24 V is available. The signal status can be used in the system in a flexible manner.

Digital input

Number	1
Input signal	DC 0/24 V (PLC level; logical "0" = -3 to +5 V; logical "1" = +15 to +30 V)

Electrical data

Voltage supply Connection Voltage Residual ripple	Lateral (feed via base unit or router module) DC 24 V +25/-20 % 5 %
Current consumption	130 mA (at DC 19.2 V)
Power consumption	3 W
Inputs (terminals 1 to 18) Connection	At the front (removable terminal strips with Push-In technology)
Conductor cross section on terminals 1 to 18 Wire or strand without ferrule Strand with ferrule	Min. 0.14 mm ² , max. 1.5 mm ² Without plastic collar: Min. 0.25 mm ² , max. 1.5 mm ² With plastic collar: Min. 0.25 mm ² , max. 0.5 mm ²
Stripping length on terminals 1 to 18	9 mm
Electrical safety	Acc. to DIN EN 61010-1 Overvoltage category III, pollution degree 2
Electromagnetic compatibility Interference emission Interference immunity	Acc. to DIN EN 61326-1 Class A – only for industrial use – Industrial requirements

Case and ambient conditions

Case type	Plastic case for DIN rail mounting in the control cabinet (indoor use); DIN rail acc. to DIN EN 60715, 35 mm x 7.5 mm x 1 mm
Dimensions (W x H x D)	22.5 m x 103.6 m x 101.5 m (without connection elements)
Weight	Approx. 140 g
Protection rating	IP 20, acc. to DIN EN 60529
Ambient temperature range	-20 to +55 °C
Storage temperature range	-40 to +70 °C
Resistance to climatic conditions	Relative humidity ≤ 90 % annual average without condensation (climatic class 3K3 acc. to DIN EN 60721-3-3 with extended temperature and humidity range)
Site altitude	Up to 2000 m above sea level
Mechanical ambient conditions ^a	Classification acc. to DIN EN 60721-3-3, table 6, class 3M2

^a Test conditions are listed in the System Descripion B 705000.8.

Connection diagram

The connection diagram included in the data sheet provides initial information about the connection options. Only use the installation instructions or the operating manual for the electrical connection. The know-how and the correct technical implementation of the safety warnings/instructions contained in these documents are the prerequisite for the installation, electrical connection, and initial start as well as for the safety during operation.
